

International Alert to the Relief of the Haitian People

A petition, initiated by the Plateforme-Forme Haïti de Suisse (PFHS), calls for solidarity and accountability of the international community to urgently and effectively address the alarming situation of living conditions in Haiti.

Faced with the acceleration of the degradation of the civil, political, economic and social rights of citizens, the signatories trigger the alarm signal : “ Some people use to praise the resilience of the Haitian people, but this people is at the limit of its capacity to resist at the very moment when the complacency of the international community facing this tragedy is close to complicity if not synonymous with interference....”

The everyday life of the Haitians is punctuated by a dissonant waltz, by State violence, denial of justice and impunity. In addition to the institutional crisis establishing arbitrary governance by decree, there is a dying economy, plundered by corruption, which only worsens the living conditions of citizens.

It is time to coordinate and take concrete and joint initiatives to alleviate the serious attacks on democracy and human rights in Haiti, and not let the people run out of steam with the little air they have left.
